NUKI

Exemplary safe: Nuki's Smart Lock 2.0 receives AV security certificate

Nuki continues to prove its market-leading prowess with their second smart lock to be awarded a "Safe Smart Home Product"

LONDON UK, 22nd May 2019 – Nuki, the leading supplier of retrofit, smart access solutions in Europe is continuing to lead the way in pioneering smart lock technology security. The Austrian based company has had its Nuki Combo 2.0 extensively tested by the AV-TEST Institute and successfully passed the test in all areas. The AV-Test "Tested Smart Home Product" seal confirms compliance with all safety requirements based on the current test catalogue.

"*Understandably, consumers have questions and concerns especially when it comes to the category of door locks available to them*", says Nuki CEO Martin Pansy. "*That's why from the beginning we placed great value on our security concept and the overall security of our products. Because one thing is obvious, only when security is guaranteed can customers enjoy the added convenience of extensive functionality, digital permissions or time control with a clear conscience.*"

The AV-Test Institute, headquartered in Magdeburg, Germany, is an independent global leading provider of IT security and anti-virus research. In addition to the Nuki 2.0 Combo and Nuki app, the security experts also reviewed the associated Alexa Custom Skill for Amazon Echo and Nuki passed all points.

 The Nuki Smart Lock 2.0 includes Bluetooth 5 for improved range, enhanced internal processing power for speed of use, a door sensor for at-a-glance status updates on your home door, plus full Apple HomeKit compatibility. It has been specifically created to cater for the common UK oval-cylinder lock, whilst retaining Nuki's easily-installed retrofitting and integrates with existing Smart Home solutions.

AV-Test GmbH is considered to be the foremost independent research institute for IT security in Germany. For over 15 years the experts from Magdeburg have guaranteed quality-ensuring comparative and individual tests of internationally relevant IT security products. You can find the detailed test report at the AV-Test website: https://www.iot-tests.org/2019/05/certified-nuki-smart-lock-2-0/, as well as information on Nuki's security concept and previous security awards at www.nuki.io/en.

Go to Nuki's check list for installation details - https://nuki.io/en/installation-check/. The full suite of Nuki products are available on Amazon and the Nuki website.

About Nuki Home Solutions GmbH

Nuki Home Solutions is a leading provider of retrofit intelligent access solutions for Europe.

One team, one mission

"We have set ourselves the goal of making existing access solutions more intelligent and thereby replacing the physical key. We're excited to take on this challenge because we believe in simplifying everyday life through the use of mobile technologies," says Nuki CEO Martin Pansy, explaining his company's mission. Nuki Home Solutions GmbH was founded in Graz in 2014. After a successful crowdfunding campaign in 2015, the company has grown steadily and employs more than 40 people in Graz. In addition to the established Nuki Smart Lock in the current version 2.0 and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
