

Nuki Opener To Debut at the IFA Innovations Media Briefing

Nuki expands its product portfolio with the Nuki Opener, turning apartment building entrances smart, and revolutionising keyless access.

Graz, 27 June 2019 – Nuki, the world's premier retro-fitted Smart Lock is proud to announce the first live presentation of the Nuki Opener at the IFA Innovations Media Briefing on 10 and 11 July in Berlin. Nuki's vision since inception has been to replace conventional keys with bank-grade, highly encrypted Smart Locks, and the Nuki Opener takes the company one step closer to fully-integrated home security.

The Nuki Opener will soon allow residents and owners of apartment buildings complete, secure, access of their entry system. Via the building's intercom system, the Nuki Opener effortlessly opens the front door conveniently and completely keyless via the Nuki app.

"Our customers' wish list includes the option of automatically opening the front door of an apartment building," explains Martin Pansy, CEO of Nuki Home Solutions GmbH. "With the Nuki Opener we are fulfilling this wish. The opener is designed to be retrofitted on the existing intercom system. It triggers the electric door buzzer and permits access to the building. The authorised user simply has to ring the bell (Ring to Open) or to give the corresponding command via app. In combination with the well-established Nuki Bridge this works even remotely. In addition, the opener has a permanent mode that automatically opens the door each time the bell rings within a defined time frame - perfect for letting party guests in or for use in offices, holiday apartments or doctors' surgeries."

You can experience the Nuki Opener live at the IFA Innovations Media Briefings in Berlin on 10 and 11 July 2019.

Nuki Opener live at the IMB in Berlin

At the IFA Innovations Media Briefing on 10 and 11 July at the BCC Berlin, Nuki will present the Opener to the press for the first time. The event is aimed exclusively at press representatives and gives a first impression of the IFA in September. Accreditation for the IMB is possible on the IMB website.

We look forward to getting to know you personally in Berlin - if not at the IMB, then at the latest at the IFA in Hall 25.

About Nuki Home Solutions GmbH

Nuki Home Solutions is a leading provider of retrofit intelligent access solutions for Europe.

One team, one mission

"We have set ourselves the goal of making existing access solutions more intelligent and thereby replacing the physical key. We're excited to take on this challenge because we believe in simplifying everyday life through the use of mobile technologies," says Nuki CEO Martin Pansy, explaining his company's mission. Nuki Home Solutions GmbH was founded in Graz in 2014. After a successful crowdfunding campaign in 2015, the company has grown steadily and employs more than 40 people in Graz. In addition to the established Nuki Smart Lock in the current version 2.0 and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
