

The Nuki Smart Lock launches new night mode

As the night's draw in, Nuki's Night Mode brings added security tailored to your individual needs.

Graz (Austria), 29th October 2019 – Nuki, the European market-leading name in smart locks proudly announces the introduction of its 'Night Mode' feature, an update and new feature-set designed to help customers as winter approaches.

Nuki's Night Mode brings a new level of comfort and safety to the Nuki Smart Lock by combining and automatically activating specific features of the Smart Lock during the night. This ensures, amongst other features, the greatest possible security at night by double-locking the door. Users can use this function to meet their individual needs and have the option to disable Auto Unlock during the night should they wish. The Nuki Smart Lock also switches to low-power mode at night and sends out a Bluetooth signal less frequently, therefore significantly increasing battery life.

Improved User Experience

Nuki's day and night profiles allow customers to adapt their Smart Lock to their individual needs. For example, families with small children whose sleep could be easily disturbed by Auto Unlock can disable it and instead use a normal key when they come home late. The same applies if you work from home during the day and don't need Auto Lock during this period but want to make sure that your house is always safely locked during the night.

Improved Low Battery Warning

Do not be afraid of low batteries! Before the current update, Nuki notified users via a notification in the app and optional push notifications as soon as battery power was below 20 percent. With the new update a battery warning will now be displayed in the lock overview of the app for extra reassurance.

About Nuki

Devised by multi award-winning Austrian designers EOOS.com, built in Europe, and utilising bank-grade security software, the Nuki Smart Lock 2.0 and Nuki Opener are fully compatible with Android and iOS and can be used to assign digital access rights to friends, family, and service providers via the companion app. Nuki offers the convenience of the optional Nuki Fob and Nuki Keypad – ideal access solutions for children, tradespeople, carers and for those without a smartphone. The optional Nuki Opener also enables the operation of the front door to apartment buildings simply via the Nuki app, as well as remotely.

To date, Nuki has delivered over 70,000 Nuki Smart Locks to customers, by the end of 2019 the company expects to surpass 100,000 installed locks. "We are incredibly proud of how positively our system has been received by customers and that we are experiencing fast and healthy growth", says Martin Pansy. "With over 70 million detached houses and 50 million apartment buildings in Europe, our core market, there's still plenty of room to grow."

About Nuki Home Solutions GmbH

Nuki Home Solutions is a leading provider of retrofit intelligent access solutions for Europe.

One team, one mission

"We have set ourselves the goal of making existing access solutions more intelligent and thereby replacing the physical key. We're excited to take on this challenge because we believe in simplifying everyday life through the use of mobile technologies," says Nuki CEO Martin Pansy, explaining his company's mission. Nuki Home Solutions GmbH was founded in Graz in 2014. After a successful crowdfunding campaign in 2015, the company has grown steadily and employs more than 40 people in Graz. In addition to the established Nuki Smart Lock in the current version 2.0 and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
