

NUKI

THE DIGITAL ACCESS SOLUTION FOR HEALTH CARE PROVIDERS

THANKS TO NUKI YOU DO NOT NEED TO WORRY ABOUT...

- Key management and key deposit
- Time-consuming key handovers
- Cylinder exchanges due to lost keys
- Unforeseeable sick leaves

OUR SOLUTION:

1. ACCESS

Reliable access to the living space of people in need of care.

2A. FOB

Open doors via Bluetooth remote control.

2B. KEYPAD

Easy access by entering a 6-digit access code.

2C. INTEGRATION

Thanks to the open API, the features of the Nuki software can be integrated into health care software solutions.

EASY AND SMART ACCESS:

The Nuki Smart Lock gives carers easy access to the living space of people in need of care and turns the smartphone into a key.

Designed as a retrofit solution, the Smart Lock is installed on the inside of the door over the existing cylinder within a few minutes – without screws or drilling.

Carers unlock the doors either:

- by pushing the button on the Nuki Fob
- by entering a 6-digit code on the Nuki Keypad
- via the Nuki integration on the smartphone or tablet

COST SAVINGS

SECURITY

TIME EFFICIENCY

KEY MANAGEMENT

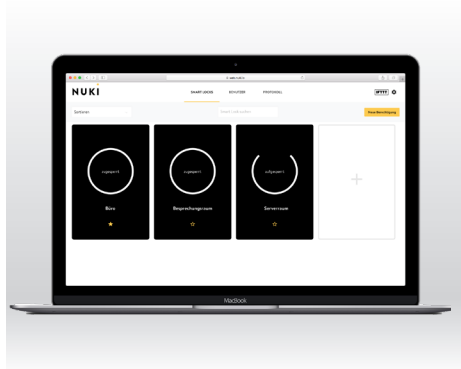

NUKI COMBO (CONSISTING OF NUKI SMART LOCK AND NUKI BRIDGE)

- Physical keys get replaced by a combination of hard- and software remote control via Nuki app or Nuki Web
- No need to worry about lost keys

NUKI FOB

- Easy, keyless entry
- If lost, the Fob is easier to deactivate or replace and more cost-saving than a complete cylinder replacement

NUKI WEB

- Easy management tool for entry codes
- Create and manage access permissions
- Detailed tracking of all locking activities

NUKI KEYPAD

- Secure access without key and smartphone
- Individual access permissions
- Simple fitting

ADVANTAGES

SMART

- Remote opening of the door
- Elimination of time-consuming door openings by locksmiths, fire brigades or the police
- Open API for easy integration

SIMPLE

- Retrofittable - easy 3-minute elf-installation on the inside of the door - without screwing or drilling
- Management of access permissions via the Nuki app or the Nuki Web

SECURE

- Fast and secure access in case of emergency
- Tracking of locking activity
- Security and safety confirmed by experts

BEST PRACTICE THIS IS HOW EASILY IT WORKS

The Nuki functions are integrated into MOCCA ONE, the care software solution from ilogs, an Austrian healthcare software provider:

- The mobile nursing staff use the MOCCA ONE apps on their mobile devices.
- When the nursing staff arrive at a person in need of care, they open the app and can thus open the door in addition to routine tasks.
