NUKI

Nuki confirms Android widget and app shortcuts now available

Make your Smart Lock your silent companion in everyday life.

Graz (Austria), 14th November 2019 – To make the Nuki Smart Lock even more comfortable and easy to use for consumers, the team at Nuki have developed a new widget for Android (previously launched on iOS).

The new widget means that users don't have to open their Nuki app to operate their smart lock, but instead, will be able to execute all lock actions very quickly (unlock, lock, open door, Lock 'n' Go, Ring to Open) through the widget. If you happen to be away from home, you will need to confirm the door open action twice so that you don't accidentally initiate a lock action.

The widget is available in both a dark and a light version and users can create as many Smart Lock widgets as they like. Check out the Nuki website for more details: https://nuki.io/en/

As an alternative to the widget, Nuki have also added the possibility for app shortcuts in the current app version. By pressing and holding the Nuki app symbol users can jump to their favourite Smart Locks and save them to the home-screen as shortcuts. This way users can reach their desired Smart Lock in the Nuki app even faster and control it more easily.

The Nuki Smart Lock turns your smartphone into a key and seamlessly fits over your existing lock and key in less than three minutes. It can be used to assign digital access rights to friends and family and negates the need to hide a key under a flowerpot. It allows you to open the door remotely if you need to give someone access in your absence.

Note: To use Android Widgets, you need the latest version of Nuki app (2.5.0 or later).

About Nuki
Devised by multi award-winning Austrian designers EOOS.com, built in Europe, and utilising bank-grade security software, the Nuki Smart Lock 2.0 and Nuki Opener are fully compatible with Android and iOS and can be used to assign digital access rights to friends, family, and service providers via the companion app. Nuki offers the convenience of the optional Nuki Fob and Nuki Keypad – ideal access solutions for children, tradespeople, carers and for those without a smartphone. The optional Nuki Opener also enables the operation of the front door to apartment buildings simply via the Nuki app, as well as remotely.

To date, Nuki has delivered over 70,000 Nuki Smart Locks to customers, by the end of 2019 the company expects to surpass 100,000 installed locks. "We are incredibly proud of how positively our system has been received by customers and that we are experiencing fast and healthy growth", says Martin Pansy. "With over 70 million

detached houses and 50 million apartment buildings in Europe, our core market, there's still plenty of room to grow."

About Nuki Home Solutions GmbH

Nuki Home Solutions is a leading provider of retrofit intelligent access solutions for Europe.

One team, one mission

"We have set ourselves the goal of making existing access solutions more intelligent and thereby replacing the physical key. We're excited to take on this challenge because we believe in simplifying everyday life through the use of mobile technologies," says Nuki CEO Martin Pansy, explaining his company's mission. Nuki Home Solutions GmbH was founded in Graz in 2014. After a successful crowdfunding campaign in 2015, the company has grown steadily and employs more than 40 people in Graz. In addition to the established Nuki Smart Lock in the current version 2.0 and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
