

## Nuki's Opener receives AV security certificate

**Nuki's full product line-up is not only safe, but according to the AV-TEST, implements data protection in an exemplary manner.**

**Graz (Austria), 28th November 2019** – Nuki, the leading supplier of retrofit, smart access solutions in Europe is continuing to lead the way in pioneering smart lock technology security. The Austrian based company has had its Nuki Opener extensively tested by the AV-TEST Institute and successfully passed the test in all areas. The AV-Test "Tested Smart Home Product" seal confirms compliance with all safety requirements based on the current test catalogue.

The Nuki Opener is a product designed for apartment buildings and enables the operation of the front door to apartment buildings simply via the Nuki app, as well as remotely. For more information on the features of the Opener please go to <http://www.nuki.io/en/opener>.

"Safety has always been at the core of Nuki's developments," said Martin Pansy, CEO of Nuki Home Solutions. "It was clear to us that comfort at the expense of safety cannot exist. Our challenge to date is to combine comfort and safety. This also means that we only implement functions when there is no doubt about security. And in order to live up to this claim, we have all our products put through reviews and certifications by external experts. "

The AV-Test Institute, headquartered in Magdeburg, Germany, is an independent global leading provider of IT security and anti-virus research. In addition to the Nuki 2.0 Combo and Nuki app, the security experts also reviewed the associated Alexa Custom Skill for Amazon Echo and Nuki passed all points.

Just like the Nuki Smart Lock, the Opener can simply be retrofitted and turns intercoms into smart entry systems. The Nuki Opener is connected to the intercom allowing it to trigger the door buzzer when activated. Users can open the front door directly or remotely through the app – in combination with the Nuki Bridge.

AV-Test GmbH is considered to be the foremost independent research institute for IT security in Germany. For over 15 years the experts from Magdeburg have guaranteed quality-ensuring comparative and individual tests of internationally relevant IT security products. You can find the detailed test report at the [AV-Test website](#) - as well as information on Nuki's security concept and previous security awards at [www.nuki.io/en](http://www.nuki.io/en).

### About Nuki

Devised by multi award-winning Austrian designers EOOS.com, built in Europe, and utilising bank-grade security software, the Nuki Smart Lock 2.0 and Nuki Opener are fully compatible with Android and iOS and can be used to assign digital access rights to friends, family, and service providers via the companion app. Nuki offers the convenience of the optional Nuki Fob and Nuki Keypad – ideal access solutions for children, tradespeople, carers and for those without a smartphone. The optional Nuki Opener also enables the operation of the front door to apartment buildings simply via the Nuki app, as well as remotely.

To date, Nuki has delivered over 70,000 Nuki Smart Locks to customers, by the end of 2019 the company expects to surpass 100,000 installed locks. "We are incredibly proud of how positively our system has been received by customers and that we are experiencing fast and healthy growth", says Martin Pansy. "With over 70 million detached houses and 50 million apartment buildings in Europe, our core market, there's still plenty of room to grow."

### **About Nuki Home Solutions GmbH**

Nuki Home Solutions is a leading provider of retrofit intelligent access solutions for Europe.

One team, one mission

*"We have set ourselves the goal of making existing access solutions more intelligent and thereby replacing the physical key. We're excited to take on this challenge because we believe in simplifying everyday life through the use of mobile technologies,"* says Nuki CEO Martin Pansy, explaining his company's mission. Nuki Home Solutions GmbH was founded in Graz in 2014. After a successful crowdfunding campaign in 2015, the company has grown steadily and employs more than 40 people in Graz. In addition to the established Nuki Smart Lock in the current version 2.0 and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future. Further information can be found at <https://nuki.io/en/>.
