

NUKI DOOR SENSOR

DATA SHEET

CAREFREE WHILE ON THE MOVE WITH THE NUKI DOOR SENSOR

With the new door sensor and the Nuki app, you can always keep track of your front door. The Nuki Door Sensor can be installed on the interior side of your door in just a few simple steps without any drilling or screwing. When combined with the Nuki Smart Lock 3.0 (Pro) and the free Nuki app, you can be sure your door is closed and securely locked – even when you're not nearby. You will be notified if your door is open longer than usual or if the Door Sensor detects movement in the door. No need to worry about whether the door is closed and locked.

ADVANTAGES

- Easy to mount onto the interior side of your door.
- You always know if your door is securely closed and locked.
- Receive a notification if your door is open longer than usual or if someone tries to lock the door while it is open.
- Automatically lock your door as soon as you leave your home.
- Integrated tamper detection ensures maximum security.
