

Exclusive Nuki bundles available in 96 Apple Stores across Europe

The Nuki Smart Lock is now available in Apple Stores in Germany, Austria, France, Spain, Italy, UK and the Netherlands - both in the 96 retail shops offline and online at apple.com.

Graz (Austria) – 03/05/2022. **Starting today, the Nuki Smart Lock 3.0 and the Nuki Smart Access Kit 3.0 specially designed for Apple are available in various Apple Stores including Germany, Austria, France, Spain, Italy, UK and the Netherlands. The latest generation of the retrofittable door lock is compatible with Apple HomeKit and can be installed and ready for use in just a few minutes.**

Nuki 3.0 generation works with Apple HomeKit

"Apple HomeKit's evolution has been phenomenal over the past years. It's hard to imagine the smart home landscape without it," explains Nuki CEO and co-founder Martin Pansy. "The majority of our user base is on iOS so the HomeKit integration into our third product generation was essential. Today, we are very happy to see our Smart Locks in more international Apple Stores." The Nuki Smart Access Kit 3.0 is exclusively available for Apple customers. It includes the Nuki Smart Lock 3.0, the Nuki Fob and the Nuki Keypad. The Smart Lock 3.0 is now available in elegant white, and fits seamlessly into the existing entrance area. The Nuki Fob, a compact Bluetooth remote control, as well as the Nuki Keypad are practical alternatives to opening doors via Apple's Home app or the Nuki app. The Fob allows opening at the push of a button - perfect for children or seniors without smartphones. With the Keypad, the door can be opened via six-digit access codes, which can be assigned individually.

More convenience and peace of mind in everyday life

In just a few minutes, the Nuki Smart Lock 3.0 can be retrofitted to the existing front door - without any screws or drilling. After installation, the smart door lock is integrated directly into HomeKit and can be controlled via the Home app on Mac, iPhone and iPad, and via Siri voice command. Automations and integration with other smart home devices bring comfort to everyday life. With HomeKit, for example, the lamps can be switched on as soon as someone unlocks the door. While you are enjoying the evening after work, you can make sure that the front door is securely locked at a desired time. This also works remotely without the optionally available Nuki Bridge (www.nuki.io/bridge) thanks to Apple HomeKit, HomePod mini, Apple TV, or iPad set up as a home hub within Bluetooth range of the Nuki Smart Lock.

Direct communication between Apple Watch LTE and Nuki

Wearables are becoming increasingly popular and Apple Watches in particular are ideal everyday companions. With the Apple Watch LTE users can now directly control their Nuki Smart Lock and leave their iPhones at home. This allows the door to be opened from the Apple Watch LTE without it being connected to your iPhone, which means a whole new level of freedom in everyday life.

Prices and availability of Nuki products at Apple

The Nuki Smart Lock 3.0 can be purchased directly from Apple at a price of 149 Euro. The exclusive Nuki Smart Access Kit 3.0 is available for 249 Euro and includes the Smart Lock 3.0, the Nuki Keypad and the Nuki Fob. The products are available online at apple.com and offline in 96 Apple Stores in Germany, Austria, France, Spain, Italy, the UK and the Netherlands.

About Nuki Home Solutions GmbH

Nuki is a leading provider of retrofit intelligent access solutions for Europe.

Our mission

“We shape the way people access homes. Our products are simple, make life easier and are reliable companions for our customers. What makes us successful is our dynamic and diverse team. Because we focus on the essentials and are constantly developing,” says Nuki CEO Martin Pansy, explaining his company’s mission.

Nuki Home Solutions GmbH was founded in Graz (Austria) in 2014. After successful crowdfunding in 2015, the company has grown steadily and employs more than 100 people in Graz. In addition to the established Smart Lock and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
