NUKI KEYPAD 2.0

Data sheet
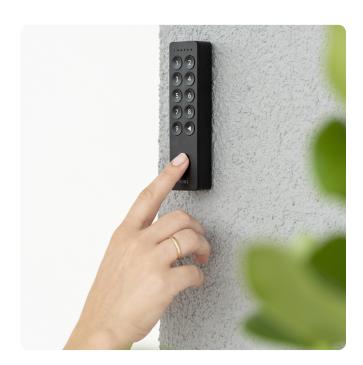

With the Keypad 2.0, your door can be opened with a fingerprint or with a 6-digit entry code. And quickly, conveniently, and securely at that.

- ⌐ **Quickly:** Using just a fingerprint, the door is opened in a matter of seconds.
- ⌐ **Conveniently:** Your finger is enough to unlock your door.
- ⌐ **Securely:** The fingerprint sensor provides a high level of security.

Easy for everyone

The Nuki Keypad 2.0 can be used with the Nuki Smart Lock 2.0, 3.0 and 3.0 Pro. The battery-powered Keypad can be installed in a matter of minutes: It is simply glued to the front door from the outside.

- ⌐ **The Nuki Keypad 2.0 is ideal...**
  - ... for people who can't or don't want to use a code, such as young children or seniors
  - ... for people who don't have their own smartphone

- ⌐ **The Nuki Keypad 2.0 is practical...**
  - ... because the door can be opened very quickly and easily
  - ... because the smartphone can even stay at home for once
  - ... because it's no longer a problem if your smartphone's battery runs out
