

App update

Nuki makes Auto Unlock even better. With the current app update for iOS, the automatic door opening of the Nuki Smart Lock can be individually adjusted.

Graz (Austria) – 02/21/2023. **Auto Unlock is the most popular function of the Nuki Smart Lock. The automatic door opening is even better with the current update of the iOS app to version 2023.2.1. An individually adjustable opening delay avoids doors being opened too early.**

Content of this message:

- Automatic door opening Auto Unlock gets even better.
- Individually adjustable opening delay optimizes Auto Unlock function.
- Now in the current version of the Nuki app for iOS, the Android app already contains the function.
- Nuki App as a free download in the Apple App Store and Google Play Store.

Auto Unlock gets even better

Automatic door opening has always been by far the most popular feature among Nuki Smart Lock users. With the current update of the iOS app, the reaction of the lock can now be adjusted so that the door opens with a slight or long delay. Customers adjust the Auto Unlock function so that the door opens at the desired moment.

How does Auto Unlock work?

So that the front door opens as if by magic when you approach, Nuki uses both geolocation and Bluetooth. Nuki draws a virtual circle with a radius of 100 meters, the so-called geofence, around the Smart Lock location – i.e. the home. If this invisible limit is crossed from the outside, the Nuki app actively starts to search for the Bluetooth signal from the lock. Since Bluetooth has a comparatively short practical range of a few meters, the smartphone and lock have to come quite close. Establishing a stable connection between the mobile phone and the lock triggers the door opening. Ideally, this happens exactly when the owners are right in front of the door.

When the lock is too fast

It can happen that the Bluetooth connection is established very early and Nuki opens the front door too early. For example, when you take the stairs in an exemplary manner and you can already hear the castle buzzing, although there is still one floor to climb. The situation is similar with parking spaces near the front door, where the door opens even though you are still sitting in the vehicle. Such and similar situations are now a thing of the past. Users will find the new item "Auto Unlock Speed" in the Auto Unlock settings. In addition to the standard setting, a slight or even strong delay can be selected

Price and availability

The Nuki app can be downloaded free of charge from the Apple App Store and the Google Play Store. Auto Unlock is a function of the Nuki Smart Lock. Nuki Smart Lock 3.0 and 3.0 Pro can be attached to almost any house or apartment door without tools or the support of a tradesman. Customers can find further information including an installation check on the Nuki website.

About Nuki Home Solutions GmbH

Nuki is a leading provider of retrofit intelligent access solutions for Europe.

Our mission

“We shape the way people access homes. Our products are simple, make life easier and are reliable companions for our customers. What makes us successful is our dynamic and diverse team. Because we focus on the essentials and are constantly developing,” says Nuki CEO Martin Pansy, explaining his company’s mission.

Nuki Home Solutions GmbH was founded in Graz (Austria) in 2014. After successful crowdfunding in 2015, the company has grown steadily and employs more than 100 people in Graz. In addition to the established Smart Lock and an extensive range of accessories, Nuki is working hard to further develop smart access solutions for a completely keyless future.
