

Nuki Web API

v.1.5.0

20.06.2023

UPDATED ENDPOINTS

Path	Endpoint	Description	Example payload for SL without Smart Hosting
Smartlock	POST /bulk-web-config	Updates the web config for a group of smartlocks	No changes

Smartlock	GET	/smartlock	Get a list of smartlocks	[["smartlockId": 13434261644, "accountId": 0, "type": 0, "favorite": false, "serverState": 1, "adminPinState": 1, "virtualDevice": false, "error": "No active Smart Hosting subscription for the Smart Lock, please get one!", "subscriptions": []]]
Smartlock	PUT	/smartlock	Create a smartlock	Not applicable
Smartlock	GET	/smartlock/{smartlockId}	Get a smartlock	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}	Update a smartlock	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }

Smartlock	DELETE	/smartlock/{smartlockId}	Delete a smartlock	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/action	Lock & unlock a smartlock with options	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/action/ lock	Lock a smartlock	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/action/ unlock	Unlock a smartlock	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }

Smartlock	POST	/smartlock/{smartlockId}/admin/ pin	Updates a smartlock admin pin	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/advanc ed/config	Updates a smartlock advanced config	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/advanc ed/openerconfig	Updates an opener advanced config	Not applicable
Smartlock	POST	/smartlock/{smartlockId}/advanc ed/smartdoorconfig	Updates a smartdoor advanced config	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
Smartlock	POST	/smartlock/{smartlockId}/config	Updates a smartlock config	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }

Smartlock	POST	/smartlock/{smartlockId}/sync	Syncs a smartlock	No changes
Smartlock	POST	/smartlock/{smartlockId}/web/config	Updates a smartlock web config	No changes
SmartlockAuth	GET	/smartlock/auth	Get a list of smartlock authorizations for your smartlocks	[["smartlockId": 17913012514, "authId": 3431701, "type": 2, "enabled": true, "remoteAllowed": true, "lockCount": 0, "error": "No active Smart Hosting subscription for the Smart Lock, please get one!"]]
SmartlockAuth	POST	/smartlock/auth	Updates smartlock authorizations asynchronously	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
SmartlockAuth	PUT	/smartlock/auth	Creates asynchronous smartlock authorizations	Authorizations will not be created for the Smart Locks without Smart Hosting. No error message will be returned. Please validate the response by calling the GET/smartlock/auth endpoint.
SmartlockAuth	DELETE	/smartlock/auth	Deletes smartlock authorizations asynchronously	Authorizations will not be deleted for the Smart Locks without Smart Hosting. No error message will be returned. Please validate the response by calling

				the GET/smartlock/auth endpoint.
SmartlockAuth	GET	/smartlock/{smartlockId}/auth	Get a list of smartlock authorizations	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
SmartlockAuth	PUT	/smartlock/{smartlockId}/auth	Creates asynchronous a smartlock authorization	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
SmartlockAuth	GET	/smartlock/{smartlockId}/auth/{id}	Get a smartlock authorization	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
SmartlockAuth	POST	/smartlock/{smartlockId}/auth/{id}	Updates asynchronous a smartlock authorization	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }

SmartlockAuth	DELETE	/smartlock/{smartlockId}/auth/{id}	Deletes asynchronous a smartlock authorization	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }
SmartlockLog	GET	/smartlock/log	Get a list of smartlock logs for all of your smartlocks	[{ "id": "64704a031599fa2b8a6f2920", "smartlockId": 13434261644, "deviceType": 0, "action": 255, "trigger": 255, "state": 255, "autoUnlock": false, "date": "2023-05-26T05:56:19.000Z", "source": 6, "error": "No active Smart Hosting subscription for the Smart Lock, please get one!" }]
SmartlockLog	GET	/smartlock/{smartlockId}/log	Get a list of smartlock logs	{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }

AdvancedApi	PUT	/smartlock/auth/advanced	Creates asynchronous smartlock authorizations	<p>Authorizations will not be created for the Smart Locks without Smart Hosting. An error message will be returned containing the Smart Lock IDs for which auths could not be created.</p> <p>Response 200:</p> <p>"error": "Auths cannot be created. Please get Smart Hosting subscription for the Smart Locks with ID: 12121212121"</p>
AdvancedApi	POST	/smartlock/{smartlockId}/action/advanced	Smartlock action with callback	<pre>{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }</pre>
AdvancedApi	POST	/smartlock/{smartlockId}/action/lock/advanced	Lock a smartlock	<pre>{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }</pre>
AdvancedApi	POST	/smartlock/{smartlockId}/action/unlock/advanced	Unlock a smartlock	<pre>{ "detailMessage": "No active Smart Hosting subscription for the Smart Lock, please get one!", "stackTrace": [], "suppressedExceptions": [] }</pre>
